

EARL S. POLLACK is a study director for the Committee on National Statistics. He was formerly chief of biometry at the National Cancer Institute. Prior to that, he was director of the Division of Biometry and Epidemiology at the National Institute of Mental Health. More recently, he was research professor at the Biostatistics Center, George Washington University and served as senior statistical advisor for the Center to Protect Workers' Rights, the construction research arm of the AFL/CIO. His interests are in chronic disease epidemiology and in the analysis of observational data from large health and medical data bases. He is a fellow of the American Statistical Association, the American College of Epidemiology, and the American Public Health Association. He received B.S. and M.A. degrees in statistics from the University of Minnesota and a ScD in biostatistics from Harvard University.
