

Esha Sinha joined the Committee on National Statistics as associate program officer on July 27, 2009. Previously she worked extensively with SUNY Binghamton student records on such topics as whether advanced placement or SAT scores are better predictors of college success and performance of transfer students. She earned her M.A. in economics from GIPE, India, and worked for a year as research assistant in the Indian Institute of Management, Ahmedabad, before attending SUNY Binghamton. She recently completed a Ph.D. in economics at SUNY Binghamton under the direction of former CNSTAT study director Prof. Edward C. Kokkelenberg.
